

# Meet the Expert

## Genome engineering using the CRISPR/Cas9 technology

Sjoerd van Deventer, Bas van der Schoot &  
Felix Fenneman

### When & where

11 December 2018

13:00 – 15:00 hrs

De Pont A room

RIMLS building, route 290

Registration required via  
[www.rimls.nl/agenda](http://www.rimls.nl/agenda)

### Additional data in 2019

22-01: Valorisation

19-02: Statistis

12-03: Pipetting

16-04: Data management

14-05: RNA sequencing

11-06: Making your figures

02-07: Seahorse

10-09: Imaging in animals

15-10: CRISPR/Cas9

12-11: Flow cytometry

10-12: .....

### About

Are you planning to start to use the CRISPR/Cas9 technology for your research? And would you like to hear more about different approaches and get some tips and tricks? Or are you already working with the method and experienced some difficulties?

The “Meet the Expert” session will allow you to address your questions in an informal setting to two colleagues, which have successfully used CRISPR/Cas9 for their projects, in order to help you to start using the technique or to tackle your problems.
