Thursday 20 January 2022

15:30-17:30 hrs

Location: Mertens D, route 139
(COVID measures depending)

Registration required via
www.rimls.nl/agenda

About

Guidance and supervision of internship students is usually part of a PhD project. You have already been there as bachelor and master student, but the view is different from the other end, as a PhD candidate, as the supervisor this time.

What determines good supervision? How can you make sure expectations of both parties are met? How do you give constructive feedback? In this interactive workshop, we will cover different aspects of supervision. Tips and tricks are given and personal experiences of the participants are discussed. You can bring your own case!
