

PR 007774

CXCL13 IN CSF

PAGE 1/1

VALID UNTIL 01-01-2024

**Intended use:**

Differential diagnosis of neuroborreliosis, neuro-lues and cerebral lymphoma.

**How to send samples?**

A centrifuged aliquot of cerebrospinal fluid (minimal volume 1 ml) can be sent to our laboratory for analysis.

Note: The CSF should be sent frozen on dry ice to our laboratory. We adhere to this procedure, until we have gathered more information on the stability of this compound.

**Analysis frequency**

Every 2 weeks.

**Turn-over time**

2.5 weeks.

**Reference values**

Age	Upper reference limit (p95) ( $\mu\text{g/L}$ )
< 15 years	< 800 pg/ml
15 - 50 years	< 800 pg/ml
> 50 years	< 800 pg/ml

**Address for sending material:**

Radboud University Medical Center  
Radboudumc Diagnostic Laboratory  
Route 815  
Attn. TML, Neurochemistry, dr. MM Verbeek  
PO 9101  
6500 HB NIJMEGEN  
The Netherlands
