

Mini symposium

Imaging Cancer: from molecule to man

When & where

Monday 23 November 2020
13:30 – 16:30 hrs
Online ZOOM meeting

Hosts

Alessandra Cambi
Annemiek van Spriel
Jeanette Pots
Koen van den Dries
Mark Rijpkema

Registration

Required via

Ija.Smit-deWitte@radboudumc.nl

Program

13:30 - 14:10

14:10 - 14:50

14.50 - 15.10

15:10 - 15:50

15:50 - 16:30

Samantha Terry (King's College London)
The dark art of creating successful imaging tracers.

Giorgio Scita (IFOM, Milan)
Solid-to-Fluid transitions in breast cancer progression.

Break

Jorge Barbazan (Institut Curie, Paris)
Cancer-associated fibroblasts supracellular contractility controls tumor architecture through active compression of tumor cells.

Johannes Textor (Radboudumc, Nijmegen)
Direct detection and phenotyping of immune cells in multiplex immunohistochemistry.
