

Seminar

Spectral Cytometry

Sebastiaan van Bockstael

Cytek Biosciences

When & where

Monday 17 February 2020

13:00 – 14:00 hrs

Meeting room 1 (OOV),

Route 448

Host

Rob Woestenenk,

Radboud Technology Center

Flow Cytometry

Registration

Not required

About:

Spectral Cytometry is rapidly changing the world of flow, allowing researchers to get more information out of their samples than ever before. The Cytek Aurora is the first flow cytometer that is able to detect 40 fluorescent parameters in one single tube, with outstanding resolution. Join us and discover the basics of Spectral Flowcytometry and how the Cytek Aurora can help you achieve your research goals.
