About

Sruthi Sreekumar
Founder greEnCap

Let us zoom to have a casual meeting with Dr. Sruthi Sreekumar. She will take us on her personal journey from academia to Start Up.

The two founders Dr. Sruthi Sreekumar and Dr. Carolin Richter develop an innovative, environmentally friendly and sustainable organic plant protection product based on the microencapsulation of essential oils in a bioactive matrix made of chitosan. In doing so, they make an important contribution to sustainable and environmentally friendly agriculture.

Feel free to get comfortable and perhaps you may want to enjoy a beer during this online social event.
